MODEL 600038

MODEL 600038FRC

MODEL 600038C

Size: 80/203 x 26/66 x 35/88 high
 with T3626 Tray
 Design Load: 500 lbs./227 kg.

The Model 600038 Stainless Steel Autopsy Carrier with Rollers is designed as an integral part of the Total Roll System for cadaver handling. It accepts the standard stainless steel body trays used in the Model 86-129 Roller Rack or any of the Mortuary Refrigerators. It can be fabricated simply as a transfer carrier or it can be sloped for drainage and be used as the actual autopsy carrier. The use of rollers allows for easy loading and unloading of cadavers. With the complete Total Roll System, minimal manual cadaver handling is necessary. It is fabricated with a permanent slope of 1.5 in./3 cm.

STANDARD DESIGN FEATURES

- Stainless steel has a grained finish and all welds match adjoining surfaces
- Standard design for 23 in./58 cm. body tray, please inquire for special order sizes
- 8 in./20 cm. diameter casters, all with brake mechanism
- Flip latch to hold tray in position while in transport
