SPECIMEN SHELVING

Adjustable Wire Shelving	24
Wall Mounted Wire Shelving	25
Adjustable Solid Shelving.....	26
Security Shelving	27
Side Wall Protectors and Corner Guards	28

CABINETS

Each cabinet is fabricated of 18 gauge prime quality Type 304 stainless steel with a No. 4 satin finish. The joints on the face are a flush butt joint and heliarc welded. Welds are then ground and polished to match all exposed surfaces equal to a No.4 finish. Corners are reinforced with angles or welded as required. Service access panels are removable with tools and are provided in the back of base cupboard cabinets. Each cabinet is fabricated with a 3.5 in./8 cm. high by 3 in./7 cm. deep toe space. As an optional feature, end bottom corners are fitted with a 14 gauge gusset and adjustment bolt. Both sides of all cabinets are finished.

DOORS

Hinged doors are 1 in./2.5 cm. thick with a double pan construction. Door hinges are secured by welds.

Sliding doors shall be constructed similar to the hinged door without hinge reinforcements. Each sliding door is fitted with two grooved nylon sheaves to ride on an stainless steel track which is set in the bottom of the case. The top of each door has two nylon guides, to prevent metal to metal contact. Rubber bumpers and stops are supplied with all doors.

Glazed doors shall be similar to the metal doors with vertical and horizontal stiles (2 in./5 cm. in width). The doors shall be glazed with 6mm (7/32") thick clear glass set in with rubber cushion strips or plastic guides. Glass is replaceable by removing the glass retainer frame from inside the door. Frameless glass doors are constructed of tempered glass.

DRAWERS

Drawer bodies are formed of 18 gauge stainless steel with a fully covered bottom and a reinforcing hem on the top edges. Drawers have integral stops to prevent accidental withdrawal but may be removed without the use of tools. Drawers are equipped with full extension, ball bearing suspensions, with a capacity load of 100 lbs./45 kg. per drawer. This full extension allows the entire contents to be accessed and provides for a smooth and silent operation.

HARDWARE

All exposed hardware is brushed stainless steel. Hinges are .093 in./2 cm. thick stainless steel Laboratory/Hospital type. Hinges are warranted to provide a minimum of 500,000 door openings without appreciable wear. Hinges are welded to doors and frames. Doors over 42 in./106 cm. high have three or more hinges as required. All doors are provided with ball catch assembly for closing. Pulls are available in two styles, a satin chrome plated extended handle or a bar pull with a satin finish. Both are mounted to the inside head with mounting screws on 4 in./10 cm. centers. When doors are supplied with a lock, the lock will be a removable core for enhanced security and quick rekeying. In cases of double doors, the left door will be fitted with an astragal.

CABINET SHELVES

Shelves have front ends flanged down 1 in./2 cm. with an additional .5 in./1.2 cm. flange for strength. the flanges at the sides and back are turned up at an angle to establish firm contact with the side walls. All shelves are supported on stainless steel shelf clips, adjustable on .5 in./1.2 cm.

COUNTERTOP CONSTRUCTION

Stainless steel counters are formed and have a thickness of 1.25 in./3 cm. Counters are adjacent to walls and come with back splashes that are a standard 4 in./10 cm. high. Back splashes can be higher upon request. Integral end are optional. The underside of counters are reinforced with stainless steel channels and has a sound deadening material applied. Stainless steel counters are uniformly polished after all fabrication. The resulting finish is uniform and equivalent to a No.4 satin mill finish. Stainless steel sink tops have a raised, no-drip front marine edge.

STAINLESS STEEL SINKS

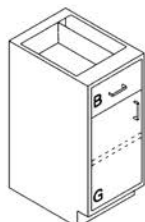

Stainless steel sink bowls are formed and welded from sheet steel to provide a seamless construction. Internal corners are rounded to a 0.5 in./1.2 cm. radius and the bottom is punched and formed to receive a strainer and is pitched slightly to insure complete draining. Sinks are welded into counter tops and ground smooth, providing a water-tight joint.

MINIMUM GAUGE REQUIREMENTS

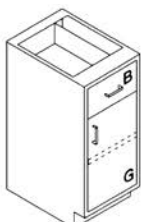

Cabinet top	18 gauge
Cabinet sides, back, bottom	18 gauge
Cabinet finish back panels	18 gauge
Door and drawer outer pans	18 gauge
Door and drawer inner pans	18 gauge
Drawer body	18 gauge
Counter top, back-splash,	
sink bowl.....	14 gauge
Shelves, sloped tops	14 gauge
Table frames, legs.....	18 gauge

- Glass hinged solid doors

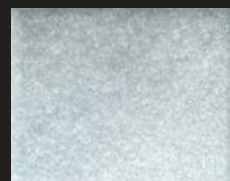

Standard Depth- 30/76.2
Standard height- 72/183, 84/213

Mobile Specimen Shelving

- (5) Adjustable Shelves
- (4) Casters with brakes
- Open grid mesh

WORKS GREAT WITH:

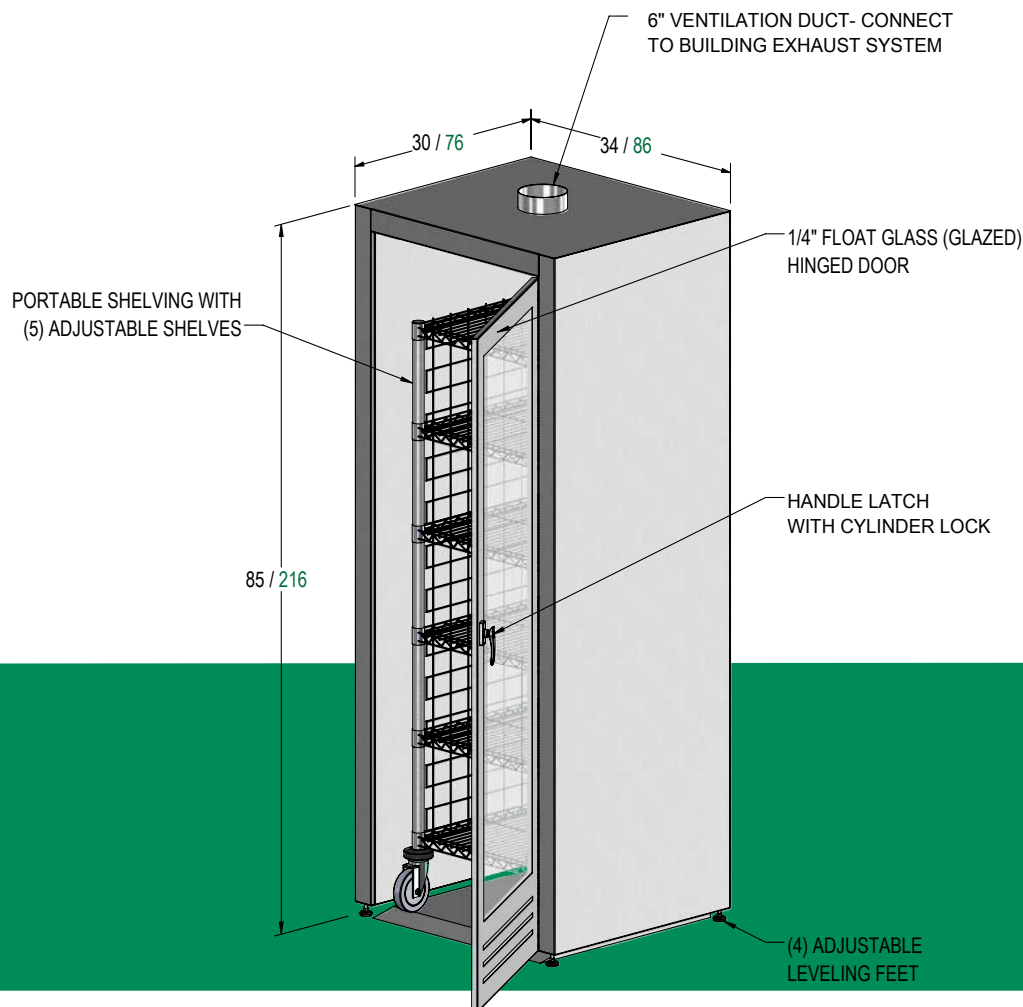

FORMALDEHYDE NEUTRALIZER PADS

All measurements in inches/centimeters

CASEWORK & SPECIMEN SHELVING

Mortech's ventilated tissue storage is intended fit anywhere in your facility. It is ducted to the buildings exhaust system and the vents out any fumes your storage items may have. For improved organization and storage accessibility racks roll in and out with ease.

INTEGRATED SHELVING

- Plexi glass door
- Integrated stainless steel shelving
- Height adjustable shelves
- Locking door latch
- Adjustable leveling feet
- Top duct access

CASEWORK & SPECIMEN SHELVING

HIGH DENSITY MOBILE SHELVING SYSTEM

Double your storage space instantly with the economical mobile shelving system. Provides instant access to inventory and allows maximum air and light circulation. The high density shelving system is designed to eliminate unnecessary aisles, free up floor space and increase the number of shelving units that can be used in a designated area.

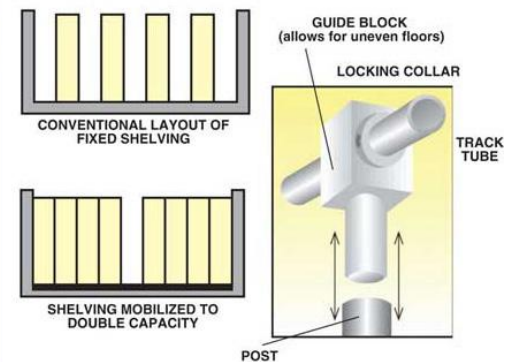

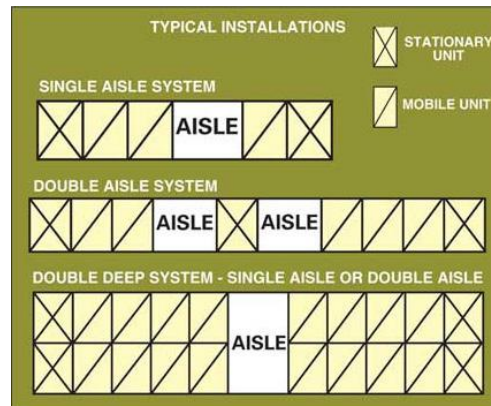

HIGH DENSITY MOBILE SHELVING SYSTEM

CASEWORK & SPECIMEN SHELVING

High density mobile shelving is done by combining stationary and mobile units, to create or eliminate aisles as needed. The stainless steel overhead track assures smooth shifting of units, eliminating dirt and debris build-up that usually occurs with floor mounted systems and compensates for uneven floors.

Both stationary and mobile units are available with a variety of shelf sizes and finishes. Mobile units have 5" polyurethane wheel casters. Simple installation makes this system practical and easy to use.

CASEWORK & SPECIMEN SHELVING

Unique design offers high volume, easy access storage in a variety of finishes to suit your needs. Open wire truss reinforced shelves feature front to back welded surface ribs for added strength. Increases light penetration, free air circulation and specimen container visibility. Minimizes moisture and dust accumulation. Easily adjustable and expandable to change with your needs. Shelves adjust on 1 in./2 cm increments.

Wire Finishes

Stainless Steel

Provides stability and durability, handles moisture and temperature extremes. Resists rust and corrosion.

Poly Brite

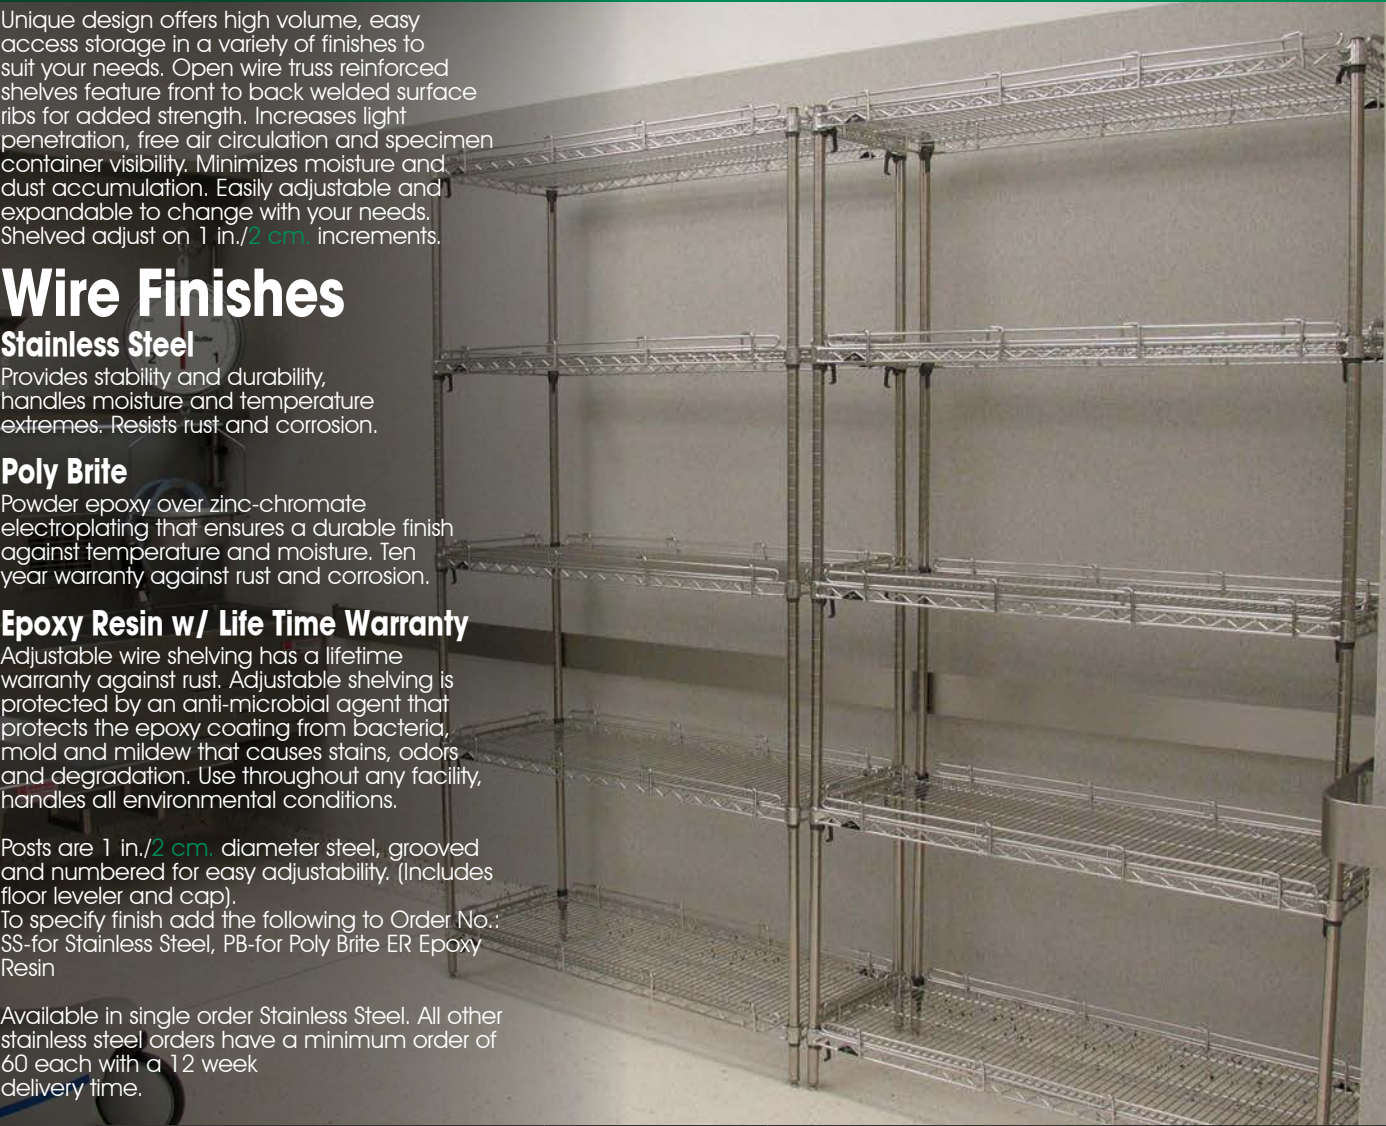

Powder epoxy over zinc-chromate electroplating that ensures a durable finish against temperature and moisture. Ten year warranty against rust and corrosion.

Epoxy Resin w/ Life Time Warranty

Adjustable wire shelving has a lifetime warranty against rust. Adjustable shelving is protected by an anti-microbial agent that protects the epoxy coating from bacteria, mold and mildew that causes stains, odors and degradation. Use throughout any facility, handles all environmental conditions.

Posts are 1 in./2 cm diameter steel, grooved and numbered for easy adjustability. (Includes floor leveler and cap). To specify finish add the following to Order No.: SS-for Stainless Steel, PB-for Poly Brite ER Epoxy Resin

Available in single order Stainless Steel. All other stainless steel orders have a minimum order of 60 each with a 12 week delivery time.
