

MODEL BTX-WIFI **WIFI TEMPERATURE** **MONITOR & ALARM** **with EXTERNAL SENSOR**

IMPORTANT NOTE:

MESSAGING & DATA RATES MAY APPLY

Automatic system can send you text messages (SMS) on your phone number if any measurement detected out of your defined bounds to alarm you. The text messages can come in anytime during the day and night and the sender's phone number is +16042561841. Text message's cost will be deducted from your credit for that particular sensor based on operator's rates in your region which can be found in "My Credit" table in "My profile" page. Rates are subjected to possible change at anytime without prior notice.

Sending Text messages will be stopped if your credits run out. You are solely responsible for maintaining a positive credit balance to continue receiving text message and phone alerts. There is no charge for email alerts and notifications

WiFi Temperature Monitor & Alarm with External Sensor

A water proof temperature recorder and alarm system with external sensor (IP67). Powered by 2 replaceable AA batteries for up to 10 years and connects directly to WiFi.

Unit is a cloud-based alarm system performing accurate metering and a reliable logging.

All setting parameters like measurement intervals, upload intervals, and minimum and maximum allowed temperature thresholds can be set through a web-based application on any platform. It sends out email and text message alarms as soon as any temperature exceeds or falls below pre-set limits. It also provides access to the records history, graphs and periodical reports. Its hardware and software installation is very easy and does not require any specific tools or applications.

GENERAL SPECIFICATIONS

Sensor	1.5 meter (5 ft.) External temperature sensor (Stainless steel)
Temperature measurement and alarm range (Sensor only)	°C -55 to +125 °F -67 to +257
Upload temperature range*	°C -5 to +70 °F 20 to +160
Temperature measurement accuracy	°C ± 0.5 (± 0.9 °F)
Power supply	2 x AA replaceable batteries
Sensor's protection class	IP 67
Compliances	IEEE 802.3, EN 61326-1, EN 61010, EN 12830, FCCID: 2AHMR-ESP12F, CE, ROHS, HACCP
Battery life*	Up to 6 years
Upload intervals	One hour to once a week (or on demand)
Record intervals	1 minute to 120 minutes (down 2 sec. by order)
Interface	Wi-Fi - IEEE 802.3 – 2.4 GHz
Max. number of internal records	16,384 – Automatic cloud sync and replace

Key Features

			
Direct Wi-Fi connection	Waterproof & washable	Up to 10 years of battery life	Push alarm for out of range registration
			
Access to your records on all devices	Graphs, reports & detailed records	Email & text message alarms	Cloud storage For +20 years

Installation Instructions

Using 5/16 bit, drill hole through panel completely through to other side.

Suggested Tools
(not provided).

Provided Hardware:

- (1) Monitor Bracket
- (8) Self Tapping Screws
- (4) Plastic Cable Guides
- (1) Permagem

Center mounting bracket over 5/16 hole. Mark four Mounting holes for monitor bracket. Small pilot hole can be drilled for screws. Once drilled, use a Phillips screw driver (recommended) to install mounting screws. A drill gun can be used to install self tapping screws, but this must be done carefully as to not strip out the mounting hole.

Insert probe through hole in mounting bracket and feed probe wire through 5/16 hole.

Pull probe through from opposite side of the wall.

Once pulled through seal drilled hole on both sides with Permagem, to prevent air conflict.

Align mounting holes on unit with mounting screw heads on bracket.

Once lined up, turn slightly clockwise to lock in place.

Using self tapping screws provided mount bracket to wall.

Seal interior hole with Permagem.

Using plastic cable guides and tapping screws, begin securing probe wire to interior wall. Four Clips are provided. Clips can be used at your discretion. Secure monitor probe end last.

WiFi Temperature Monitor & Alarm with External Sensor - Operation & Set-up

- Create an account at www.Loggermaster.com and log in
- You will be taken to the Basic Functions Menu
- Follow steps below to proceed with Set-Up
- You can also visit:

<https://www.loggerflex.com/help-step-5/>

for more details and to access this units instructional videos

Logout

- Add your new device to your account by clicking plus symbol

- Find your device's serial number and DUID on back of device

Device attributes

Serial number **91901978** DUID **08630457**

(8 Digits)

Click to Save

(8 Digits)

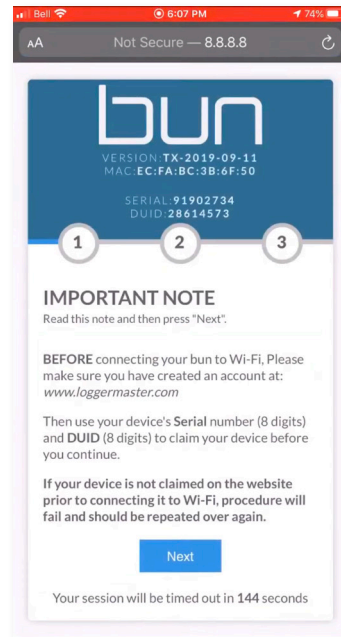

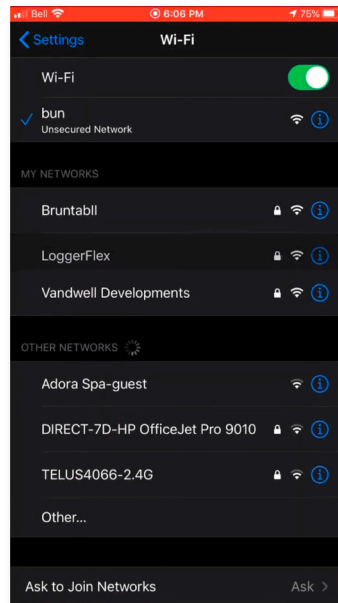

- Connect your device to the internet via WiFi:

Method 1: Normal Procedure

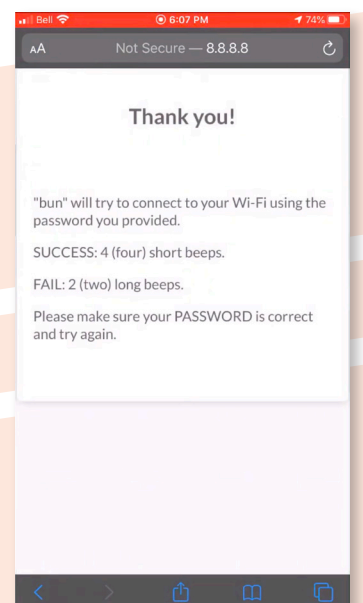

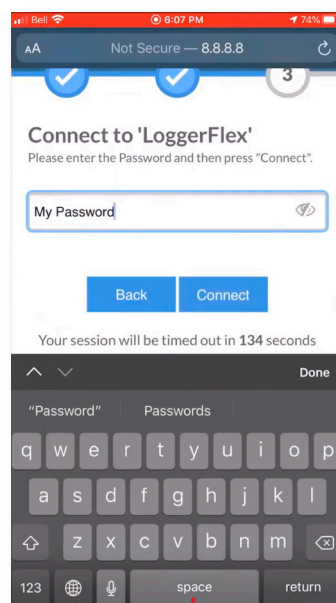

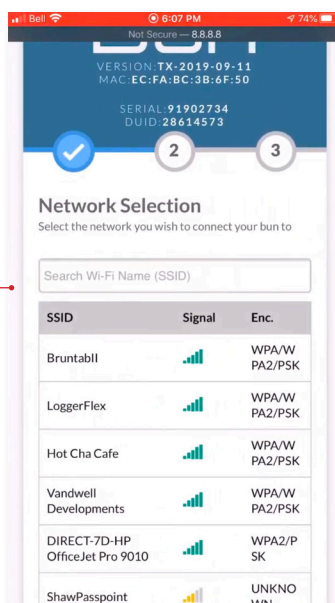

- Press (hold for half second) the **"SETUP MODE"** button on the back of your device
- You will hear a long beep — and the red light will turn on

- Using your phone or computer, navigate to WiFi setting and look for the network called **"bun"**, and connect to it (sign-in to network - **Don't expect internet connection**)

- 1 - A browser will automatically popup (or a sign-in notification will appear)
- If not, open a browser and key in 8.8.8.8
- 2 - Find your WiFi's name and click on it (SSID)
- 3 - Enter your password

You can always find your device's Serial#, DIUD# and MAC Address here

- Connection to Internet

2 long beeps

- If failed: Check WiFi's availability and password accuracy and try again or try method 2

4 short beeps

- Connect your device to the internet via WiFi:

Method 2: Short cut (using WPS button)

**Requires physical access to router that supports WPS*

- Press both "SYNC NOW" and "SETUP MODE" together (hold for half second)
- Press WPS button on your router
- You will hear 3 beeps
- RED and BLUE lights will frequently switch back and forth

2 long beeps

4 short beeps
